DETAILED ACTION

1. This communication is responsive to the amendment dated 06/18/2004.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “**a plurality of ribs formed on an exterior periphery of the skin**” in claim 28 and others must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 21-22, 25-30, 32-34, 104-105, 108-113 and 115-117 are rejected under 35 U.S.C. 102(b) as being anticipated by Aceti et al. (U. S. Pat. - 5,881,159).

Regarding claims 21-22 and 104-105, Aceti et al. disclose a hearing aid (10), comprising: a deformable skin (14, 16) bounding an internal region (Fig. 2); and at least one spine (12)

Art Unit: 2643

extending axially along an interior surface of the skin, which is attached thereto sufficiently so as to provide insertion rigidity when inserted into the user's ear canal as claimed.

Regarding claims 25-27, 32-33, 108-110 and 115-116, Aceti et al. further disclose the hearing aid, wherein a deformable matrix (16) applying expansive forces to the skin.

Regarding claims 28 and 111, Aceti et al. further disclose the hearing aid, wherein a plurality of ribs (15) formed on an exterior periphery of the skin as claimed.

Regarding claims 29-30 and 112-113, Aceti et al. further disclose the hearing aid, wherein an audio output transducer (22) surrounded, at least in part, by a compressible matrix (Figs. 1-2) as claimed.

Regarding claims 34 and 117, Aceti et al. further disclose the hearing aid, wherein a faceplate (26b) attached to the skin.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 23-24, 31, 106-107 and 114 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aceti et al. (U. S. Pat. - 5,881,159).

Regarding claims 23-24 and 106-107, Aceti et al. do not clearly teach the hearing aid further including a sound conductive tube as claimed. Since providing a sound tube for a hearing aid is very well known in the art, it therefore would have been obvious to one skilled in the art at

Art Unit: 2643

the time the invention was made to provide a suitable sound tube for the hearing aid, in order to desirably deliver acoustic output to the user.

Regarding claims 31 and 114, Aceti et al. do not clearly teach the matrix comprises at least one of open cell foam, closed cell foam, and a fabric as claimed. Since providing a desirable otoplastic material for the hearing aid housing is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide a suitable otoplastic material, such as at least one of an open cell foam, a closed cell foam, and a fabric for the hearing aid, in order to provide more comfort to users.

Response to Amendment

5. Regarding the newly submitted claims 118-126 directed to an invention that is independent or distinct from the invention originally claimed, which contains newly introduced limitations, such as “at least **one electrical component** ...” with all the limitations added, which clearly are not from the elected invention originally claimed (claims **21-34** and **104-117**).

Since applicants have received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims **118-126** are not original presented and elected and are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The requirement is still deemed proper and is therefore made FINAL.

6. Applicant's arguments dated 06/18/2004 have been fully considered, but they are moot in view of the new ground(s) of rejection.
